FOODABILITY_{co.}

OUR BUSINESS

Harnessing 25 years of experience in process engineering and project management for the food manufacturing and broader Agri-sectors, Foodability Co. has the knowledge, skill and innovative thinking to help you unlock the potential of your business.

Based in Toowoomba, Queensland, Foodability Co. is proud to contribute to the sustainability of the agricultural and food manufacturing industry throughout Australia and internationally. We offer a range of unique and flexible project management and investment support services that can be tailored to meet the short or long-term resource needs of your project.

We have built around us a team of highly skilled professionals and a network of industry specialists

that have the diverse experience and knowledge to provide a holistic approach to project management, including:

- › Operations and production
- › Premises, plant and other equipment
- › Food safety and quality systems
- › Town planning and licences
- › Environmental and OH&S
- › Business processes and systems
- › Supply chain and logistics
- › Utilities and facility maintenance

SOME OF OUR CLIENTS INCLUDE:

“

Our strength lies in the intimate understanding that we have of your plant, process, and operating systems and how they must function in today's consumer focused environment, and our extensive network of professionals that will bring your project to life.

”

Project Management Services

Foodability Co. works collaboratively with clients to develop and integrate systems, processes and manufacturing technologies that maximise return on investment and minimise risk at every step of the value chain.

We become an extension of your team to support you right throughout the project life cycle, from concept design and feasibility through to the detailed design and construction stages.

Our diverse skills and knowledge provide our clients with the comfort that we know and understand the implications of change and the effect on whole of plant outcomes and regulatory obligations, including market access, bio security, food safety, integrity of data, risk and environmental requirements.

The Foodability Co. team can support you with:

- › Assessing, supporting and optimising on-site processes, plant equipment and management systems
- › Configuring plant and equipment to comply with market requirements
- › Developing and implementing strategy to upscale operations
- › Exploring and integrating new technologies to provide real world, practical solutions
- › Providing specialist advice and guidance to deliver optimum speed to market
- › Value adding products to maximise return on investment
- › Designing and implementing lean manufacturing systems
- › Develop and deliver change strategies, including increased up time for plant reliability, increased yield and recoveries, reduction of labour and energy efficiencies
- › Sharing our extensive knowledge base to develop capability

Defining the project is where Foodability Co. really provides value.

We offer a Front-End Engineering and Design (FEED) service which defines the project budget, brief and timeline upfront, providing you assurance of costs and project deliverables prior to engaging external design and construction services.

Our disciplined and controlled project management methodology and stage gate process gives our clients confidence that project deliverables have been adequately scoped and defined. This provides a platform to manage the project without any additional surprises.

We then work with you to assess the strategy and manage the outcomes of the client-contractor engagement process to deliver optimum results.

Investment Support Services

Foodability Co. offers a range of services to assess and support on-site processes, plant, equipment and management systems.

› Maintaining and Managing Operations

Utilising our extensive experience in large-scale production plants, we can work with you throughout the operational aspects of your business to optimise and extend the life of your assets, including plant efficiency, reliability and environmental performance.

› Pre-Investment Assessments

Foodability Co.'s rigorous pre-investment asset and operation assessment services support the due diligence requirements of our clients' investments, helping you to make informed investment decisions.

We leverage our expert knowledge and extensive network to identify and evaluate operational, reliability, OH&S and environmental risks that may need to be considered in the investment process.

Precinct Urban Planning have worked with Michael Matthewson, Principal of Foodability Co. on a variety of intensive agriculture and complex food processing projects including extensive dairy's, livestock feedlots, milk and juice processing plants. We have found Michael and the team at Foodability Co. to be extremely proficient and knowledgeable in the project management and efficient delivery of such projects.

Foodability Co. has a comprehensive knowledge of the practical and commercial imperatives involved in the successful establishment of agribusiness and food based enterprises, and both coordinate and work effectively with associated consultants in facilitating the establishment of such enterprises. We consider Foodability Co. to be industry leaders in this specialised area of project coordination and delivery and give them our highest possible recommendation to prospective clients in this area. We look forward to the opportunity of working with Foodability Co. on future projects.
